Zibo Zhuoxing Enterprises Co., Ltd.

concrete material

concrete material is a new generation of high-performance superplasticizer developed by our company.

After the addition of this product, concrete has a high slump retention performance, within half an hour slump loss is basically not lost, 1h slump loss is very small with a low amount of recycling agent, high water reduction rate, shrinkage reduction and other characteristics.

This concrete materials can greatly improve the fluidity of concrete, so that the concrete can maintain good construction performance for a long time;

At the same time, it can improve the workability and physical and mechanical properties of concrete and improve the quality of concrete.

Suitable for all types of concrete

concrete material is suitable for high strength, ultra-high strength and medium strength concrete, as well as concrete requiring early strength, moderate frost resistance and large fluidity.

Suitable for precast concrete members.

Zibo Zhuoxing Enterprises Co., Ltd.

It is suitable for reducing water and strengthening component of various compound admixtures (namely base material).

Usage

1. According to the usage requirements of concrete, the optimal amount of water-reducing agent should be determined after the elite test.
2. This product can be mixed into concrete with mixing water at the same time, or it can be mixed with post-mixing method.
3. This concrete material shall not be mixed with other admixtures at will. Please pay attention to clean the slots when changing the admixtures.
4. When changing cement varieties, cement adaptability should be confirmed.

After-sales service

Sincerely to entertain guests, letter to the talent, so that customer benefit maximization is our pursuit!

The R&D team is always keeping the production technology updated by on-going innovation and cooperation with some universities and scientific centers in china.we provide powerful technical service for our
